

Consistent focus on the increasing energy costs in conjunction with all FS-packaging devices by using the latest technology. (Update 01.05.2020)

€ continuously heated

Bags per day with doublesealing

### Calculation table

Basis for the calculation of the table is a KW/h price of 26 ct. Calculated that all devices are working on 14 hours a day at 25 working days / month.

	100	50	40	30	10	bags per day with two sealings costs € monthly
€	1,07	0,94	0,92	0,90	0,84	

15,10\*

\* The additional "hidden" energy costs from cooling down the area around the device is not calculated in this table. (Depending on the room temperature: additional factor up to 2.5 energy expenditure) Not applicable for all FS-devices!

up to 2.5 times value of consumption

Energy consumption of cooling down the heated air after the heat release duration heated appliances
